

Gawler and District College campus clean

How targeted cleaning solutions refreshed the campus, ready for the busy graduation period

OBJECTIVES

Gawler and District College needed its campus refreshed. The key areas we focused on were the canopy supports, concrete corridor, and the stage and canteen area.

Different cleaning equipment, styles and products were needed to cater to the different surfaces.

SOLUTIONS

We used a high-pressure cleaner on the canopy supports for targeted dirt removal and a scrubber to remove embedded stains from concrete corridors. The stage walls required cleaning with soft cloths to safeguard the AV equipment.

Our cleaning provided immediate visible results. The canopy supports shone like new, and the corridors looked fresh. The stage was spotless, and all AV equipment remained safely intact. The area was ready for the graduation celebrations.

AT A GLANCE

CHALLENGES

- Job scheduled out of school hours during school holidays.
- Canopy height required a scissor lift.
- Delicate AV equipment required tailored cleaning methods.

BENEFITS

- Sparkling white canopy supports.
- Refreshed concrete corridors.
- Protected AV equipment on stage area.
- Facilities were prepared for end of year graduation celebrations.

TESTIMONIAL

The client was thrilled and would like to book us for the same time next year.

BENEFITS

Sparkling white canopy supports.

The canopy supports appeared freshly painted after the targeted pressure clean, creating a welcoming, fresh appearance.

Refreshed concrete corridors

A deep-clean of the corridors removed the stains and embedded dirt in these high-traffic areas.

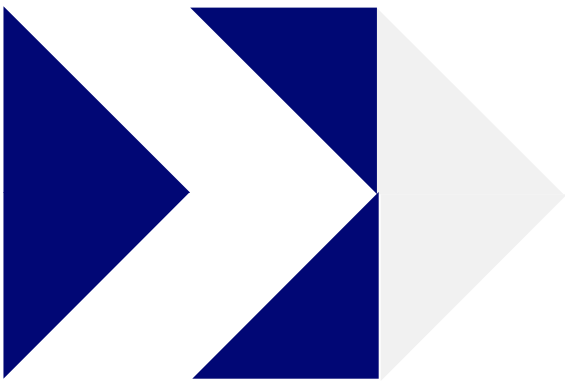

Protected stage area

The stage area required careful cleaning due to the AV equipment. By removing dust buildup from around vents, equipment operates more efficiently and is less likely to overheat.

Campus prepared for year-end graduation celebrations

Term four is a busy time with graduation ceremonies and celebrations. Completing this work over the school holidays meant the campus was presented at its best during the busy event period.
