

Graffiti removal in Adelaide's CBD

How quick action makes all the difference against graffiti

OBJECTIVES

An Adelaide CBD business contacted us after discovering graffiti tags along the rear laneway wall of their premises.

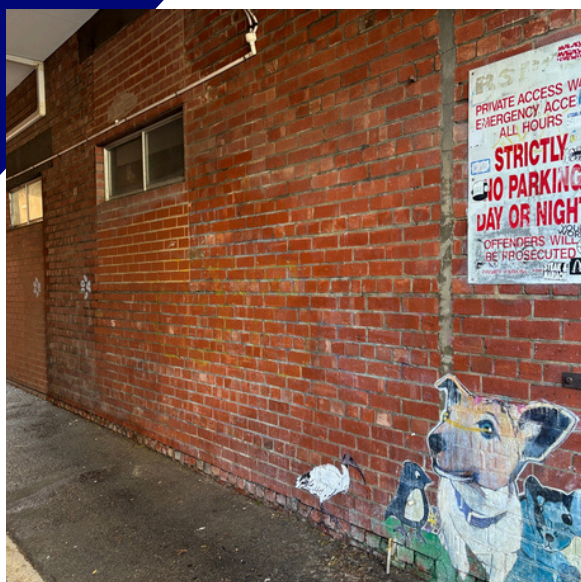

They asked if we could quickly remove the graffiti to maintain the property's professional appearance, protect legitimate mural artwork, and deter reoffending. Time was critical to minimise the risk of more tags appearing and to preserve kerb appeal.

SOLUTIONS

We attended the site within 24 hours of the request and used a targeted combination of specialist graffiti remover and gentle pressure cleaning techniques to safely lift the paint without damaging the legitimate wall art.

All work was completed with minimal disruption to nearby businesses and foot traffic.

AT A GLANCE

CHALLENGES

- Fast turnaround to minimise visual impact and decrease risk of repeat tagging.
- Ensuring graffiti removal while preserving legitimate wall art.
- Access restrictions due to CBD location – tight space, limited parking.

BENEFITS

- Reduced risk of reoccurrence
- Protected legitimate artwork
- Cost savings through early action
- Maintained kerb appeal

BENEFITS

Reduced risk of reoccurrence

According to the Australian Institute of Criminology, rapid graffiti removal – ideally within 24 to 48 hours – is one of the most effective ways to deter repeat offences.

Protected legitimate artwork

Adelaide's laneways are home to some awesome urban art. Our careful cleaning ensured the tagged areas were treated without harming the nearby authorised wall art – preserving the character of the laneway.

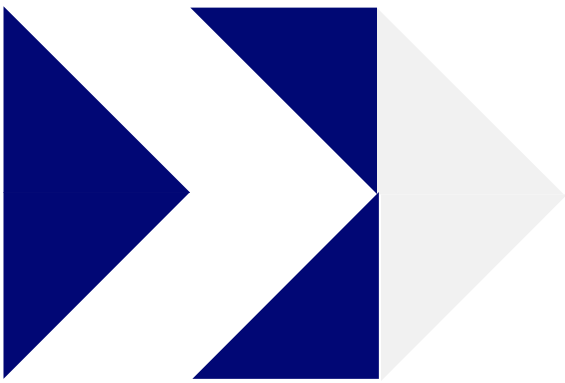

Cost savings through early action

Graffiti becomes harder and more expensive to remove over time. Quick action prevented deeper paint absorption and avoided costly restoration work.

Maintained kerb appeal

Quick graffiti removal helped maintain the professional appearance of the business. A clean, well-kept environment improves public perception of safety and pride – key factors in high-traffic areas like city laneways.
